

Feature Status

Forty-four features, four things that finish independently: the logic that makes it work, the art that makes it visible, the polish that makes it feel good, and the sound.

Every feature, four axes

L LOGIC A ART P POLISH S SOUND

- Shipped** full set, wired in
- Idle only** animated, idle is the only state
- Partial** works, not to planned depth
- Placeholder** one static frame
- Needs rework** exists but superseded
- Not started** nothing bound
- Medium** polish: passable, needs a pass
- Low** polish: rough
- n/a** does not apply

ART DEPTH

235 slots, graded by what is in the sheet

WHERE THE SLOTS LIVE

ART STATUS ACROSS ALL 44 FEATURES

FINISHED IS NOT THE SAME AS REPRESENTED

2 features are finished to a full animation set. 36 of 42 already carry art that ships in the build.

A bound slot is not finished art. A single still frame renders fine and looks done from the outside, so every slot is graded by frame content rather than by whether a sheet is attached. Two building families, Defenders and Musicians, carry nearly all the finished animation work in the game.

Where the work is

01 Audio

no SFX API

One missing system, a sound-effect layer over engine/audio.py. Until it exists, no feature is done.

02 Animation depth

116 stills

Only 25 of 235 slots carry a full set. 116 are a single still. First tier gets an idle, later tiers get a frame.

03 Enemy and boss rework

7 features

All enemy art is being redrawn. Formation has no slots, Boss era 4 has no slot, kidnap never imported.

04 UI reimport

10 screens

Every screen's art is being reimported. The Main Menu background slot is empty.

05 Seasons

0 of 3 axes

The only feature with nothing built at all. No state, no tiles, no transition, no music.

06 Cutscene video

2 of 6 done

Four of six films outstanding.

07 Empty slots

25 slots

All 8 VFX, all 4 Grass conditions, every spawning variant, both tutorial markers, camera start, start area.

Effects are shared, not bespoke. Ten procedural kinds off ten triggers in vfx.json give every building its placement, damage and death effects, so none needs its own.
